

Theodore Nelson

South African Java Developer | Spring Boot | SQL | React

Email: theodorenelson@outlook.com | GitHub: github.com/theo117 | LinkedIn: linkedin.com/in/theodore-nelson-90b05144

Portfolio: www.theodorenelson.co.za | Open to junior Java, backend, and full-stack opportunities

Professional Profile

Junior-ready software developer with hands-on experience building business applications across Java, Spring Boot, REST APIs, SQL, React, and deployment support. Strong fit for teams that need practical delivery, fast learning, and someone who understands how software supports real business workflows such as invoicing, inventory, reporting, account management, and internal operations.

Core Skills

Backend: Java, Spring Boot, REST API development, JPA, JDBC, validation, business logic

Frontend: React, Next.js, HTML, CSS, responsive interfaces, dashboard workflows

Databases and tools: MySQL, PostgreSQL, SQL schema design, Git, GitHub, documentation

Delivery: client requirement gathering, deployment support, hosting setup, domain and SSL configuration

Professional Experience

Teodor Web Solutions | Web Developer / Owner | January 2022 to Present

Lead project delivery from requirements gathering through build, launch, and post-release support for websites and business applications.

- Develop applications using Java, Spring Boot, React, Next.js, REST APIs, and SQL databases.
- Translate client needs into features, workflows, data structures, and usable interfaces.
- Handle deployment support including hosting setup, SSL, domain configuration, and release readiness.
- Built experience in communication, ownership, prioritisation, and business-facing delivery.

Selected Projects

Church Management System | Java, Spring, JPA, MySQL

Built a live system for members, ministries, and attendance, replacing slower spreadsheet-based administration.

Desktop Point of Sale | Java, Swing, JDBC, MySQL

Created an offline POS application covering product management, cart handling, transaction history, and installer packaging.

TradeFlow SA | Quotations, invoicing, and workflow dashboard

Built a business-focused platform for South African service businesses needing client, quote, and invoice workflows.

Theodore Nelson

Additional Projects

Website Agent | Diagnostics-focused web application

Built a tool that inspects websites, identifies issues, and suggests practical remediation steps.

Banking App Demo | Spring Boot, React, REST API

Delivered a full-stack demo for account access, transactions, and live frontend-backend integration.

Inventory SaaS Platform | Next.js, Supabase, PostgreSQL

Built a multi-user inventory platform with authentication, client portals, and synchronised data handling.

Education and Certifications

System Development (NQF 6) | Boston City Campus | 2022 to 2024

Focused on Java, databases, web services, SDLC concepts, and application design.

System Support (NQF 5) | Department of Higher Education and Training | 2017

Built foundational knowledge in support, troubleshooting, infrastructure, and technical environments.

Microsoft Certified Technology Specialist | Torque IT | 2012

Strengthened systems knowledge and early professional IT capability.

Why Recruiters Should Shortlist Me

- I bring practical project delivery, not just academic exposure.
- I can contribute across backend, frontend, database, and deployment tasks.
- I understand business workflows and build software around real operational needs.
- I am targeting junior roles where ownership, reliability, and growth potential matter.
