PROFESSIONAL SUMMARY

NQF 6 Systems Development graduate with hands-on experience building and deploying Java, Spring Boot, SQL, web, Android, and desktop applications, backed by IT support experience in managed services and pharmaceutical environments. Builds practical business systems with authentication, role-based access, relational data, CRUD workflows, reporting, and deployment. Brings proven troubleshooting discipline, clear user communication, and the initiative to turn operational problems into reviewable software.

TECHNICAL SKILLS

Development: Java, Spring Boot, Spring, JPA, JDBC, REST APIs, object-oriented programming, CRUD, validation, authentication, role-based access control

Web and mobile: JavaScript, HTML5, CSS3, React, Next.js, Android SDK, Java Swing, responsive interfaces, forms and dashboards

Data and tools: SQL, PostgreSQL, MySQL, Supabase, relational database design, Git, GitHub, Render, Vercel, CSV import, debugging, documentation

Support: Incident troubleshooting, desktop support, hardware and software support, basic networking, user access, printer support, workstation setup

SELECTED SOFTWARE PROJECTS

Business Operations Hub | Java, Spring Boot, PostgreSQL, Render

- Built and deployed a centralized operations dashboard combining lead capture, CSV import, invoice tracking, user administration, reporting, and account-security workflows.
- Implemented role-based authentication and SQL-backed business processes to replace fragmented spreadsheet and email tracking with one controlled workflow.

Live demo: integration-tfga.onrender.com/login

Church Management System | Java, Spring, JPA, MySQL

- Developed a centralized administration system for member records, ministries, attendance, and reporting, reducing dependence on disconnected spreadsheets.
- Modelled relational entities and practical business rules, then delivered CRUD and reporting workflows through a deployable web application.

Live: church-management-system-2-jywe.onrender.com

Desktop Point of Sale | Java, Swing, JDBC, MySQL

- Created an offline-capable POS application covering product management, cart processing, transactions, and database persistence.
- Packaged the application as a Windows installer, demonstrating delivery beyond source code through to an installable desktop product.

Source and installer: github.com/theo117/POS-App-v1

EXPERIENCE

Independent Software Projects | Junior Systems Developer
Teodor Dev Tech / Self-directed and small-client work

2022 - Present
Pretoria

- Delivered reviewable applications across Java, Spring Boot, React, Next.js, Android, SQL, and desktop technologies, selecting solutions around real administrative and operational needs.
- Translated workflow requirements into data models, authentication rules, forms, dashboards, CRUD modules, reports, and deployable releases.
- Managed source control, troubleshooting, hosting, documentation, and iterative improvements independently, demonstrating ownership and rapid learning across unfamiliar tools.

Adcock Ingram | IT Technician

2018 - 2022

- Diagnosed and resolved hardware, software, network, printer, workstation, and access issues while communicating clearly with business users.
- Supported stable day-to-day IT operations through workstation setup, maintenance, incident resolution, and practical user guidance.

Netsurit | IT Technician

2012 - 2015

- Delivered service-focused desktop, user, and basic network support in a managed IT environment, building strong incident ownership and documentation habits.

EDUCATION AND CERTIFICATIONS

System Development, NQF 6 | Boston City Campus

2022 - 2024

System Support, NQF 5 | Department of Higher Education and Training

2017

Microsoft Certified IT Professional | Torque IT

2012
