

Theodore Nelson

SOUTH AFRICAN JAVA DEVELOPER | SPRING BOOT | SQL | REACT

I build practical business software across Java, Spring Boot, SQL, React, and deployment workflows. Strong fit for teams that need someone who can contribute quickly, learn fast, and ship software around real business workflows instead of tutorial-style examples.

Target roles: Junior Java Developer, Junior Backend Developer, Junior Full-Stack Developer

EXPERIENCE

Teodor Dev Tech | Web Developer / Owner Jan 2022 - Present

Project delivery across business applications, internal tools, and client-facing products

- Lead delivery from requirements gathering through launch and support across Java, Spring Boot, React, Next.js, SQL, and hosting workflows.
- Translate client needs into features, workflows, data structures, and usable interfaces.
- Handle deployment support including hosting, SSL, domains, and production readiness.
- Built strong ownership, prioritisation, and business-facing communication that transfers well into a junior engineering team.

Open to junior Java, backend, and full-stack roles

CORE SKILLS

Backend

Java, Spring Boot, REST APIs, JPA, JDBC, validation, business logic

Frontend

React, Next.js, HTML, CSS, responsive interfaces, dashboard workflows

Data

MySQL, PostgreSQL, SQL schema design, relational modelling

Delivery

Git, GitHub, deployment support, hosting, SSL, client requirement gathering

SELECTED PROJECTS

Church Management System

Live app

Java | Spring | JPA | MySQL

- Built a live system for members, ministries, and attendance, replacing slow spreadsheet-based administration.
- Designed backend workflows and relational data structures for recurring operational tasks and reporting.

Desktop Point of Sale

Desktop app

Java | Swing | JDBC | MySQL

- Created an offline POS application covering product management, cart handling, transaction history, and installer packaging.
- Delivered desktop UI, persistence, and transaction processing in one end-to-end application.

TradeFlow SA

Business workflow

Next.js

- Built a platform for South African service businesses needing quoting, invoicing, and client management in one workflow.
- Shows ability to design software around real SME pain points instead of generic portfolio features.

Website Agent

Diagnostics tool

HTML | CSS | JavaScript

- Built a website auditing tool that inspects sites, flags issues, and turns technical analysis into useful next actions.

Clinical Reasoning Assistant

AI assistant

Next.js

- Built a clinical reasoning support app that structures consultation notes, tracks differential thinking, and generates clearer next-step checks before decision-making.

Inventory SaaS Platform

Multi-user app

Next.js | Supabase | PostgreSQL

- Built a multi-user inventory platform with authentication, client portals, and synchronised data handling.

EDUCATION

System Development (NQF 6)

2022 - 2024

Boston City Campus

Studied Java, databases, web services, SDLC concepts, and application design.

System Support (NQF 5)

2017

Department of Higher Education and Training

MCTS

2012

Torque IT

WHY SHORTLIST ME

- Proven project delivery experience, not only coursework.
- Comfortable across backend, frontend, database, and deployment tasks.
- Understands business workflows and builds around operational needs.
- Brings ownership, reliability, and strong growth potential.
