PROFILE

Junior Java developer and NQF 6 Systems Development graduate building practical Spring Boot, SQL, web, Android, and desktop applications. Portfolio includes deployed business systems with authentication, role-based access, CRUD workflows, reporting, CSV import, and relational persistence. Combines hands-on development with 10 years of IT support experience in troubleshooting, user communication, and production-minded problem solving.

CORE STACK

Backend: Java, Spring Boot, Spring, JPA, JDBC, REST APIs, OOP, MVC
Data: PostgreSQL, MySQL, Supabase, SQL modelling, persistence
Apps: JavaScript, HTML5, CSS3, React, Next.js, Android SDK, Swing
Tools: Git, GitHub, Render, Vercel, debugging, documentation

SELECTED SOFTWARE PROJECTS

Church Management System

Java, Spring, JPA, MySQL

- Built a centralized administration system for member records, ministries, attendance, and reporting, replacing disconnected spreadsheet-style tracking.
- Modelled JPA entities, relational data, validation rules, CRUD screens, and reports around day-to-day admin workflows.

TradeFlow SA

Next.js, Spring Boot, REST, JWT

- Built a live operations platform for managing customers, products, quotes, invoices, payments, and business communication in one place.
- Implemented a structured quote-to-payment workflow with PDF invoices, authenticated access, and practical business automation.

Desktop Point of Sale

Java, Swing, JDBC, MySQL

- Created an offline-capable POS covering product management, cart processing, transactions, and database persistence.
- Packaged the application as a Windows installer so it could be reviewed as a usable product, not only as source code.

Source and installer: github.com/theo117/POS-App-v1

DEVELOPMENT EXPERIENCE

Pinnacle ICT | Software Developer Intern
Software development and application support

- Contribute to software development, debugging, testing, and application support in a professional ICT environment.
- Document work clearly, follow established engineering workflows, and strengthen practical development skills through collaboration with experienced team members.

2026 - Present
Pretoria

Independent Software Projects | Junior Systems Developer
Teodor Dev Tech / self-directed and small-client work

- Built web, backend, mobile, and desktop solutions from problem definition through implementation, testing, deployment, and iteration.
- Applied Java and Spring concepts to authentication, validation, data persistence, reporting, and role-aware business workflows.
- Used GitHub for version control and maintained reviewable source paths and downloadable releases so technical work can be assessed directly.
- Investigated defects across application, database, deployment, and user-flow layers, drawing on structured IT troubleshooting habits.

2022 - Present
Pretoria

EARLIER TECHNICAL EXPERIENCE

IT Technician | Adcock Ingram and Netsurit

- Resolved hardware, software, network, printer, workstation, and access issues while communicating clearly with users and taking ownership of incidents.
- Built dependable documentation, prioritisation, and support habits directly transferable to debugging and production support.

2012 - 2015, 2018 - 2022

EDUCATION AND CERTIFICATIONS

System Development, NQF 6 | Boston City Campus

2022 - 2024

System Support, NQF 5 | MICT SETA

2017

Microsoft Certified IT Professional | Torque IT

2012
