PROFILE

NQF 6 Systems Development graduate building reviewable Java, Spring Boot, SQL, web, Android, and desktop applications. Strongest in practical business systems: authentication, role-based access, relational data, CRUD workflows, reporting, CSV import, deployment, and debugging. Brings 10 years of IT support discipline, clear user communication, and calm incident ownership into junior software development work.

CORE STACK

Java: Spring Boot, Spring, JPA, JDBC, OOP, MVC, REST APIs
Data: PostgreSQL, MySQL, Supabase, SQL modelling, persistence
Frontend: JavaScript, HTML5, CSS3, React, Next.js, Android SDK, Swing
Workflow: Git, GitHub, Render, Vercel, debugging, documentation

SELECTED SOFTWARE PROJECTS

Church Management System

Java, Spring, JPA, MySQL

- Built a centralized administration system for member records, ministries, attendance, and reporting, replacing disconnected spreadsheet-style tracking.
- Modelled JPA entities, relational data, validation rules, CRUD screens, and reports around day-to-day admin workflows.

TradeFlow SA

Next.js, Spring Boot, REST, JWT

- Built a live operations platform for managing customers, products, quotes, invoices, payments, and business communication in one place.
- Implemented a structured quote-to-payment workflow with PDF invoices, authenticated access, and practical business automation.

Desktop Point of Sale

Java, Swing, JDBC, MySQL

- Created an offline-capable POS covering product management, cart processing, transactions, and database persistence.
- Packaged the application as a Windows installer so it could be reviewed as a usable product, not only as source code.

Source and installer: github.com/theo117/POS-App-v1

EXPERIENCE

Pinnacle ICT Software Developer Intern <i>Software development and application support</i> - Contribute to software development, debugging, testing, and application support in a professional ICT environment. - Document work clearly, follow established engineering workflows, and strengthen practical development skills through collaboration with experienced team members.	2026 - Present <i>Pretoria</i>
Independent Software Projects Junior Systems Developer <i>Teodor Dev Tech / self-directed and small-client work</i> - Built web, backend, mobile, and desktop solutions from problem definition through implementation, testing, deployment, and iteration. - Translated workflow requirements into data models, authentication rules, forms, dashboards, CRUD modules, reports, and deployable releases. - Used GitHub for version control and maintained reviewable source paths and downloadable releases so technical work can be assessed directly. - Investigated defects across application, database, deployment, and user-flow layers, drawing on structured IT troubleshooting habits.	2022 - Present <i>Pretoria</i>
Adcock Ingram IT Technician - Resolved hardware, software, network, printer, workstation, and access issues while communicating clearly with business users. - Supported stable day-to-day IT operations through workstation setup, maintenance, incident resolution, and practical user guidance.	2018 - 2022
Netsurit IT Technician Delivered service-focused desktop, user, and basic network support in a managed IT environment, building strong incident ownership and documentation habits.	2012 - 2015

EDUCATION AND CERTIFICATIONS

System Development, NQF 6 Boston City Campus	2022 - 2024
System Support, NQF 5 MICT SETA	2017
Microsoft Certified IT Professional Torque IT	2012
