

Theodore Nelson

Junior Java Developer | Spring Boot | REST APIs | SQL

Pretoria, South Africa | 060 636 0886 | theodorenelson@outlook.com | github.com/theo117 | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Junior Java developer and NQF 6 Systems Development graduate who builds deployable business applications with Spring Boot, REST APIs, SQL, authentication, role-based access, CRUD workflows, and reporting. Portfolio includes backend, full-stack, Android, and desktop products built around real operational problems rather than tutorial exercises. Offers mature troubleshooting and stakeholder communication developed across 10 years in IT support, plus the curiosity and self-direction to learn new frameworks and deliver working software independently.

CORE TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring, JPA, JDBC, REST APIs, OOP, MVC, business logic, validation, authentication, RBAC, CRUD

Databases: SQL, PostgreSQL, MySQL, Supabase, relational modelling, entities and relationships, data persistence, CSV import

Frontend and applications: JavaScript, HTML5, CSS3, React, Next.js, Android SDK, Java Swing, responsive forms, dashboards

Engineering workflow: Git, GitHub, debugging, requirements analysis, SDLC, technical documentation, Render, Vercel, deployment and release packaging

TECHNICAL PROJECTS

Business Operations Hub | Java, Spring Boot, PostgreSQL, Render

- Designed and deployed an operations platform that consolidates lead capture, CSV imports, invoice tracking, reporting, user administration, and account-security flows.
- Built role-based access and SQL-backed workflows using a controller/service/data architecture, demonstrating backend business logic and end-to-end deployment.

Live: integration-tfga.onrender.com/login

Church Management System | Java, Spring, JPA, MySQL

- Converted spreadsheet-heavy member, ministry, attendance, and reporting processes into a centralized web application.
- Designed JPA entities, MySQL relationships, CRUD screens, and reporting flows around recurring administrative tasks and practical data rules.

Live: church-management-system-2-jywe.onrender.com

Banking Application Demo | Spring Boot, React, REST API

- Built and hosted a full-stack banking demo with account-management and transaction workflows, connecting backend business logic to a browser interface through REST endpoints.

Live: northstar-demo-bank-free.onrender.com

Desktop Point of Sale | Java, Swing, JDBC, MySQL

- Delivered an offline desktop POS with product, cart, transaction, and persistence workflows; packaged it as an MSI for realistic installation and review.

DEVELOPMENT EXPERIENCE

Independent Software Projects Junior Systems Developer <i>Teodor Dev Tech / Self-directed and small-client work</i>	2022 - Present <i>Pretoria</i>
• Built web, backend, mobile, and desktop solutions from problem definition through implementation, testing, deployment, and iteration. • Applied Java and Spring concepts to authentication, validation, data persistence, reporting, and role-aware business workflows. • Used GitHub for version control and maintained live demos and downloadable releases so technical work can be assessed directly. • Investigated defects across application, database, deployment, and user-flow layers, drawing on a decade of structured IT troubleshooting.	

EARLIER TECHNICAL EXPERIENCE

IT Technician Adcock Ingram, Shoprite / Checkers, Netsurit	2012 - 2022
• Progressed through 10 years of user-facing IT support across managed services, retail, and pharmaceutical settings, resolving hardware, software, network, printer, access, and workstation incidents. • Developed dependable incident ownership, documentation, prioritisation, and communication skills directly transferable to debugging and production support.	

EDUCATION AND CERTIFICATIONS

System Development, NQF 6 Boston City Campus	2022 - 2024
System Support, NQF 5 DHET	2017
Microsoft Certified IT Professional Torque IT	2012
