CURRICULUM VITAE / SOFTWARE DEVELOPMENT

Theodore Nelson

Java & Full-Stack Developer

Pretoria, South Africa / +27 60 636 0886 / theodorelnelson@outlook.com
cv.teodordev.co.za / GitHub: theo117 / LinkedIn: Theodore Nelson

01 / PROFILE

Java developer and NQF 6 Systems Development graduate building practical business applications with Spring Boot, SQL and React. Experience spans authentication, role-based access, CRUD workflows, reporting and CSV import across web, mobile and desktop applications. Brings an IT support background in troubleshooting, clear user communication and incident ownership to software development.

02 / TECHNICAL SKILLS

Backend Java · Spring Boot · Spring · REST APIs · JPA · JDBC · JWT · OOP · MVC

Frontend & apps React · Next.js · JavaScript · HTML5 · CSS3 · Android SDK · Swing

Data & delivery PostgreSQL · MySQL · Supabase · SQL modelling · Git · GitHub · Render · Vercel · MSI · Debugging · Documentation

03 / EXPERIENCE

2026 – Present

Software Developer Intern

Pinnacle ICT / Johannesburg

- Contribute to software development, debugging, testing and application support in a professional ICT environment.
- Document work, follow engineering workflows and collaborate with experienced team members.

2022 – 2025

Software Developer

Teodor Dev Tech / Pretoria

Self-directed and small-client work

- Built web, backend, mobile and desktop solutions from requirements through implementation, testing, deployment and iteration.
- Translated workflows into data models, authentication, validation, forms, dashboards, CRUD modules and reports.
- Maintained GitHub source and downloadable releases; investigated application, database, deployment and user-flow defects.

2018 – 2022

IT Technician

Adcock Ingram / Johannesburg

Resolved workstation, software, network, printer and access issues. Supported setup, maintenance and incident resolution, with clear user guidance.

2012 – 2015

IT Technician

Netsurit / Johannesburg

Delivered desktop, user and basic network support in a managed IT environment, building incident ownership, documentation and prioritisation habits.

04 / SELECTED PROJECTS

Featured / Live business platform

TradeFlow SA

Next.js · Spring Boot · REST · JWT · Vercel

A live operations platform for South African service businesses, bringing customers, products, quotes, invoices, payments and communication into one place.

Implemented a structured quote-to-payment workflow with PDF invoices, authenticated access and practical business automation.

GitHub / TradeFlow_SA Live / tradeflow.teodordev.co.za

ChurchFlow / Church Management System

Java · Spring · JPA · MySQL

Centralized administration for members, ministries, attendance, donations, events and reporting. Modelled relational data, JPA entities, validation and CRUD screens around weekly workflows, replacing disconnected spreadsheet-style tracking.

GitHub / church-management-system Live / church.teodordev.co.za

Desktop Point of Sale

Java · Swing · JDBC · MySQL · MSI

Built an offline-capable sales system for product management, cart processing, transactions and database persistence. Packaged as a Windows installer for use and review beyond the source code.

GitHub / POS-App-v1 Windows installer / JavaPOS 1.0.0

Clinical Reasoning Assistant

Next.js · React · TypeScript · OpenAI · Clerk · Vercel

A clinician-facing application turning anonymized consultation notes into structured reasoning support. Includes authenticated access, ranked differentials, red flags, suggested next checks, and editable clinical notes and referral letters for clinician review.

GitHub / clinical-reasoning-assistant Live / assistant.teodordev.co.za

05 / EDUCATION & CERTIFICATIONS

2022 – 2024

Systems Development · NQF 6

Boston City Campus / Download certificate

2017

Systems Support · NQF 5

MICT SETA / Download certificate

2012

Microsoft Certified IT Professional

Torque IT / Download certificate
