

Theodore Nelson

Junior Software Support Engineer | Application Support | Java and SQL

Pretoria, South Africa | 060 636 0886 | theodorenelson@outlook.com | github.com/theo117 | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Application and IT support professional transitioning into software support and development after extensive experience supporting users and business-critical technology across managed services and pharmaceutical environments. NQF 6 Systems Development graduate with practical Java, Spring Boot, REST API, SQL, Git, and web-application experience. Combines disciplined incident diagnosis, clear customer communication, and documentation with the ability to investigate application logic, databases, authentication, deployments, and user workflows.

SUPPORT AND TECHNICAL SKILLS

Application support: Incident triage, root-cause investigation, issue reproduction, troubleshooting, escalation, user guidance, access issues, documentation, stakeholder communication

Systems support: Windows workstations, hardware and software support, printers, basic networking, account access, setup, maintenance, operational support

Software and data: Java, Spring Boot, REST APIs, SQL, PostgreSQL, MySQL, JPA, JDBC, CRUD, authentication, role-based access, HTML, CSS, JavaScript

Tools and delivery: Git, GitHub, Render, Vercel, CSV import, deployment troubleshooting, technical documentation, SDLC, web and desktop applications

PROFESSIONAL EXPERIENCE

Adcock Ingram | IT Technician

2018 - 2022

- Diagnosed and resolved hardware, software, network, printer, access, and workstation issues, restoring users to productive work through practical, clearly communicated support.
- Owned incidents from initial user report through investigation and resolution, balancing technical diagnosis with professional updates and user guidance.
- Supported workstation setup, maintenance, and stable day-to-day IT operations in a business environment where reliability and data access mattered.

Netsurit | IT Technician

2012 - 2015

- Provided managed desktop, user, and basic network support across client environments while maintaining service-focused communication and incident documentation.
- Built a strong foundation in structured troubleshooting, equipment maintenance, escalation, and adapting explanations to users with different technical confidence.

SOFTWARE AND APPLICATION EXPERIENCE

- Independent Software Projects | Systems Developer2022 - Present
- Built and supported deployed Java, Spring Boot, SQL, React, Next.js, Android, and desktop applications, gaining practical insight into faults across code, data, hosting, authentication, and user interfaces.
 - Investigated defects, deployment issues, invalid data, and workflow problems; documented behaviour and iterated on fixes using GitHub version control.
 - Created role-based applications, forms, reports, and CRUD workflows that strengthen the ability to reproduce and explain software issues from both user and developer perspectives.

RELEVANT PROJECT EVIDENCE

- Business Operations Hub | Spring Boot, PostgreSQL, Render
- Deployed a role-based operations application with authentication, account security, CSV imports, invoice tracking, reporting, and user management.
 - Gained support-relevant practice investigating interconnected faults across user permissions, imported data, database state, hosting configuration, and business workflows.

Live: integration-tfga.onrender.com/login

- Website Agent | HTML, CSS, JavaScript, Render
- Built a diagnostic web tool that identifies website issues and translates technical findings into action-oriented guidance for non-technical users.
 - Practised turning raw technical signals into clearer support notes, priorities, and next actions that a site owner can understand.
